We are NZ's leading and only Castrol Ambassador Distributor

Thank you for considering ILS as your lubricant and services provider. For nearly 20 years, we have supplied New Zealand businesses with high quality lubricants and support services. Our portfolio includes over 350 Castrol products, along with complementary brands such as Master Fluid Solutions, JAX food grade lubricants, and reliability products like OILSAFE & Air Sentry.

Committed to providing the right solution for every industry, ILS supports sectors such as industrial manufacturing, forestry & timber, metal fabrication, energy, rail, plastics & packaging, food processing, and more. Backed by over 150 years of combined industry experience, we combine market-leading lubricants with local knowledge, practical support, and dependable service.

ILS also provides value added services including used oil monitoring, Critical Plant Monitoring, and expert support to help reduce risk, improve performance, and minimise downtime.

// We understand that quality oil is only part of the solution. It's about being a long-term business partner, not just another oil supplier. //

Brand Portfolio

In addition to Castrol's world-class lubricant range, we also offer lubricants and products from the brands below:

How to place an order with ILS

In addition to our online shop, you can also place an order quickly with our NZ based Customer Service Team.

Here's how:

Our distribution network

With distribution centres in Auckland and Christchurch, ILS holds the largest stock of Castrol products in NZ, helping prevent supply bottlenecks and ensure fast, reliable delivery. Direct EDI integration enables instant order processing, reducing delays through to dispatch.

ILS also partners with leading final mile transport providers, including hazardous goods specialists, to ensure orders are delivered in full and on time, with strict quality control at every step.

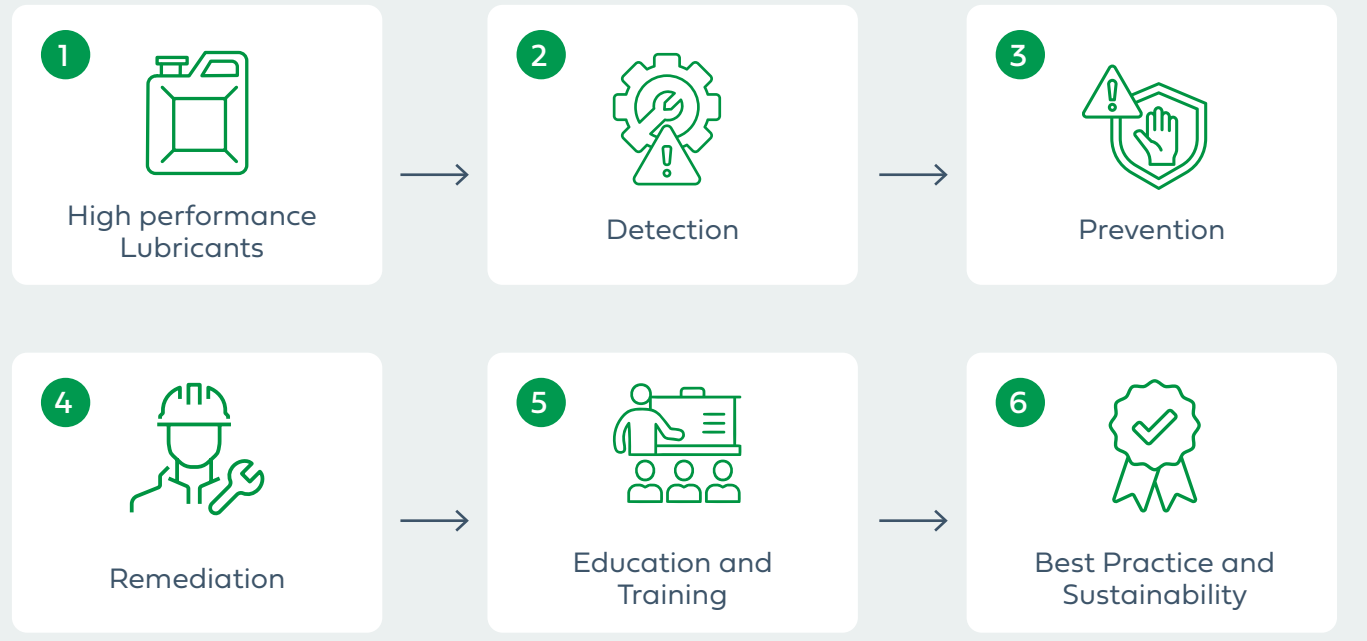

ILS Industrial Offer

Efficient, reliable operation of plant and equipment is a priority for industrial businesses across manufacturing, engineering, processing, and energy sectors. With a core philosophy of delivering value to our customers, ILS takes a holistic approach to industrial lubricant supply.

The ILS Industrial Offer is designed to increase efficiency, minimise unscheduled downtime, and reduce overall operating costs through the right combination of approved industrial lubricants, best practice systems, training, services, and equipment.

6 Steps to an Efficient Maintenance Programme

Used Oil Monitoring & Critical Plant Monitoring

Fluid monitoring helps identify trends early, reducing the risk of machinery failure, avoiding unnecessary system changeovers, & supporting better maintenance planning.

To provide clear insight into lubricant condition and the overall health of your plant and equipment, ILS offers a range of Used Oil Monitoring (UOM) services tailored to your equipment, lubricant, and operating environment. These include standard UOM and our unique Critical Plant Monitoring (CPM) programme.

Analysis & Insight

- Our test programmes are designed to match your equipment type, lubricant selection, and operating environment, delivering relevant, actionable results.
- Test suites tailored to specific equipment, lubricants, and site conditions
- Periodic test programmes scheduled in consultation with your maintenance team

- UOM programmes aligned with your lubrication schedule
- Troubleshooting and root cause analysis (RCA) testing available on request
- Local laboratory emergency testing available when required
- Reports emailed or accessible via ILS online portal
- Intuitive condition reporting for quick decision-making
- Clear technical commentary on test results

Critical Plant Monitoring (CPM)

Critical Plant Monitoring goes beyond standard condition monitoring, offering advanced diagnostic services including real time particle counting, efficiency trending, and in depth analysis.

These proactive insights help identify potential issues early, reduce unplanned downtime, and support optimal equipment performance and extended asset life.

Critical Plant Monitoring vs Used Oil Monitoring

Item	Used Oil Monitoring (Lab)	CPM
Wear metal analysis	✓	✓
Additive Levels	✓	✓
Contaminants	✓	✓
Particle Count live online sample	–	✓
Oil Temperature	–	✓
Cooler Efficiency & trending	–	✓
Pump Efficiency & trending	–	✓
Filter Pressures (Blockage) trending	–	✓
Accumulator checks (if applicable)	–	✓
Cleanliness Target setting	–	✓
Filter selection	–	✓
Filter change advice	–	✓
Trending lab results and physical results in one system & overall assessment	–	✓

Coolant Management

Effective coolant management is essential for machining performance, tool life, and overall operating cost. ILS's Coolant Management Service takes a proactive, structured approach to monitoring and maintaining metalworking fluids, helping ensure system balance, consistent quality, reduced downtime, and improved productivity.

FEATURE OF ILS OFFER

- Concentration management
 - Optimised concentrations by machine
- Tramp oil removal
 - Manage skimmers & waste oil
- pH testing
- Bacteria testing
- Bacteria control
- Stock control

BENEFIT TO YOUR BUSINESS

- Avoid concentration that is too high
 - Prevents excessive fluid usage, drag-out losses, and operator skin irritation.
- Avoid concentration that is too low
 - Reduces corrosion risk, poor surface finish, premature tool wear, and bacterial growth.
- Ensure good system health & balance
- Know what bacteria levels are present
- Intervention at the right time to control bacteria
- Reduced production costs

Food & Beverage Lubrication

ILS supplies JAX food grade lubricants with NSF H1 and 3H approvals, along with Kosher, Halal, and MPI C15 compliance, supported by site surveys and tailored lubrication schedules to reduce risk and keep operations running smoothly.

Some of the sectors we support are below.

Meat and Poultry

Bakery

Beverage

Dairy

Fruit and Vegetables

Fish and Seafood

Best Practice - Reliability products

Air Sentry

Since 1997, Air Sentry® desiccant breathers have led contamination control, protecting equipment from moisture and particulate ingress. With proven features that reduce maintenance and extend service life, the range suits a wide variety of industrial applications.

Oil Safe Range

Transfer Containers & Lids

OilSafe® colour-coded transfer containers are trusted worldwide for clean, efficient oil handling.

They feature a fully sealed, robust design to keep contaminants out, easy dispensing without funnels, and a clear colour-coding system to prevent cross-contamination.

Pumps & Accessories

The range includes Standard and Premium pumps, discharge hoses, quick connect kits, and pump breathers, all engineered to reduce contamination, improve control, and make oil handling faster and cleaner on site. With sealed components, anti drip dispensing, and optional quick connect capability, OILSAFE® helps eliminate cross contamination while simplifying day to day lubrication tasks.

ILS online store

The ILS Online Store makes ordering lubricants easier than ever

Turbo-charged product search – find what you need quickly.

Save your favorites and view order history for faster future ordering

Access to crucial hazard, storage, and tech details while ordering.
